

Introduction

A small percentage of landowners have a management plan for their woods. Having a management plan suggests that a landowner has some goals for his or her woods and are open to consulting professionals to help realize them. In general, landowners who have a management plan take a more active approach to land management. They are more likely to fall into the Working the Land landowner segment, although in some states they are mostly Woodland Retreat types. These ownerships are associated with timber harvests, employment of foresters, and participation in government programs.

Many of these landowners have worked with a natural resource professional in the past, so they have a high potential to become ambassadors to less engaged landowners. Also, there is still ample opportunity to engage with these landowners, especially since they may be willing to take on more challenging steps on their land.

Basic Statistics

Number and Acreage

- Estimated number of ownerships in this group: **7,000**.
- This group constitutes **28%** of total family woodland owners in this geography with 10+ acres.
- Total acreage covered by these ownerships: **426,000 acres**.
- This is **42%** of the total acres held in wooded acreage of 10+ acres.

Land Tenure

- Average land tenure is **24.2 years**.
- **18%** have owned this land for less than 10 years.

Percent of landowners that say their woods are

- Part of their home: **79%**
- Part of cabin or vacation home: **9%**
- Part of their farm or ranch: **33%**

Size of Holdings

The bars on the left show the proportion of woodland owners in this group who own land parcels of specified sizes. The bars on the right show how the wooded acreage held by this group of landowners is distributed among the specified parcel sizes.

Landowner Attitudes

SFFI Segmentation

Shows how the landowners in this group are distributed among the SFFI attitudinal segments.

47% of the landowners are classified as Prime Prospects. This means they have good stewardship attitudes but are not highly engaged in managing their land.

Reasons for Owning Woods

The percentage of landowners in this group who cited each of these reasons for owning land as important or very important to them.

* Non-timber forest products

Landowner Concerns

The percentage of landowners in this group who said they are concerned or greatly concerned about each of these factors.

Activities on the Land

SFFI classifies **51%** of the landowners in this group as highly engaged. This means that they have reported doing several activities to protect and improve their woods.

Past and Future Activities

The dark green bars show the proportion of woodland owners in this group that have done each of these activities in the past five years. The light green bars show the proportion who say they are likely or extremely likely to do that activity in the next five years.

Program Participation

Have management plan	100%
Have green certification	5%
Have easement	22%
Have cost-share	56%

* Non-timber forest products

Advice

77% of the landowners in this group have received advice or information about care, management or protection of their woodland in the past five years.

Sources of Advice

The proportion of landowners that said they have received advice from each of these sources in the past five years.

State or local government employee	69%
Federal government employee	7%
Private consultant	20%
Another landowner	10%
Family member or friend	13%
Other	3%

Preferred Modes

The proportion of landowners who said that they would prefer to receive advice or information in the following ways.

Talk to someone	52%
Have someone visit my land	43%
Written materials/ publications	68%
Internet	30%
Conference/Workshop	37%
Don't want any advice/information	7%

Future Plans

90% of these landowners want their wooded land to stay wooded.

20% say they plan to sell or transfer their land in the next 5 years.

35% say they would sell their land if offered the right price.

Demographics

Average age: **62.7 years**

64% have a college education or higher

43% have an annual income of \$100,000 or higher

25% have an annual income of less than \$49,000

9% rely on their woods for at least 5% of their income

White: **98%** Non-White: **2%**

Male: **89%** Female: **11%**

These landowner profiles have been developed by the Sustaining Family Forests Initiative (SFFI), a collaboration between the Yale School of Forestry & Environmental Studies, the U.S. Forest Service, and the Center for Nonprofit Strategies. SFFI aims to gain and disseminate comprehensive knowledge about family forest owners throughout the United States. For more information about SFFI, visit sffi.yale.edu. The profiles use data from the National Woodland Owner Survey (NWOS) conducted by the US Forest Service. The data in this specific summary are based on a sample of 122 families and individuals that own 10 or more acres of woodland in Maryland collected between 2011 and 2013. For more information about the NWOS, visit www.fia.fs.fed.us/nwos.
