

## Introduction

Second home owners are those who own woods as part of a cabin or vacation home. These landowners are generally wealthier than the average population, so they may not need to be as strongly convinced of the cost-effectiveness of management activities. They are more likely than the average population to be highly engaged with their land, and often have strong emotional ties to their personal hideaways.

Second home owners are almost exclusively Woodland Retreat or Working the Land owners, meaning they value their land for the amenities it provides. Messages that focus on enhancing the beauty or wildlife on the property, as well as those that stress keeping the land intact, will tap into those values. Some owners may see the property as a financial investment, and management activities that increase the value of the property may also resonate well.

Since second home owners do not rely on the financial benefits of owning woods, they may not be willing to sacrifice the “natural” look of an uncut forest for the financial return. They may only be interested in management activities that quickly and directly lead to recreational benefits. They also may simply be unwilling to work while at their vacation home.

## Basic Statistics

### Number and Acreage

- Estimated number of ownerships in this group: **13,000**.
- This group constitutes **31%** of total family woodland owners in this geography with 10+ acres.
- Total acreage covered by these ownerships: **806,000 acres**.
- This is **32%** of the total acres held in wooded acreage of 10+ acres.

### Land Tenure

- Average land tenure is **21.5 years**.
- **16%** have owned this land for less than 10 years.

### Percent of landowners that say their woods are

- Part of their home: **23%**
- Part of cabin or vacation home: **100%**
- Part of their farm or ranch: **16%**

### Size of Holdings

The bars on the left show the proportion of woodland owners in this group who own land parcels of specified sizes. The bars on the right show how the wooded acreage held by this group of landowners is distributed among the specified parcel sizes.

# Landowner Attitudes

## SFFI Segmentation

Shows how the landowners in this group are distributed among the SFFI attitudinal segments.

96% of the landowners are classified as Prime Prospects. This means they have good stewardship attitudes but are not highly engaged in managing their land.

## Reasons for Owning Woods

The percentage of landowners in this group who cited each of these reasons for owning land as important or very important to them.

\* Non-timber forest products

## Landowner Concerns

The percentage of landowners in this group who said they are concerned or greatly concerned about each of these factors.

## Activities on the Land

SFFI classifies 5% of the landowners in this group as highly engaged. This means that they have reported doing several activities to protect and improve their woods.

### Past and Future Activities

The dark green bars show the proportion of woodland owners in this group that have done each of these activities in the past five years. The light green bars show the proportion who say they are likely or extremely likely to do that activity in the next five years.

**Program Participation**

Have management plan	31%
Have green certification	1%
Have easement	3%
Have cost-share	30%

\* Non-timber forest products

## Advice

43% of the landowners in this group have received advice or information about care, management or protection of their woodland in the past five years.

### Sources of Advice

The proportion of landowners that said they have received advice from each of these sources in the past five years.

State or local government employee	18%
Federal government employee	14%
Private consultant	30%
Another landowner	4%
Family member or friend	7%
Other	3%

### Preferred Modes

The proportion of landowners who said that they would prefer to receive advice or information in the following ways.

Talk to someone	32%
Have someone visit my land	43%
Written materials/ publications	76%
Internet	39%
Conference/Workshop	20%
Don't want any advice/information	4%

## Future Plans

**94%** of these landowners want their wooded land to stay wooded.

**11%** say they plan to sell or transfer their land in the next 5 years.

**15%** say they would sell their land if offered the right price.

## Demographics

Average age: **58.2 years**

**67%** have a college education or higher

**57%** have an annual income of \$100,000 or higher

**19%** have an annual income of less than \$49,000

**2%** rely on their woods for at least 5% of their income

White: **100%** Non-White: **0%**

Male: **90%** Female: **10%**

These landowner profiles have been developed by the Sustaining Family Forests Initiative (SFFI), a collaboration between the Yale School of Forestry & Environmental Studies, the U.S. Forest Service, and the Center for Nonprofit Strategies. SFFI aims to gain and disseminate comprehensive knowledge about family forest owners throughout the United States. For more information about SFFI, visit [sffi.yale.edu](http://sffi.yale.edu). The profiles use data from the National Woodland Owner Survey (NWOS) conducted by the US Forest Service. The data in this specific summary are based on a sample of 142 families and individuals that own 10 or more acres of woodland in Vermont collected between 2011 and 2013. For more information about the NWOS, visit [www.fia.fs.fed.us/nwos](http://www.fia.fs.fed.us/nwos).
